Wednesday, March 31, 2021

Hello Joe and Brandi,

I am unsure if you received the "Notice of Owner's Inspection Due" letter from the State of Mississippi regarding the Owner's Inspection for the levee due by March 31st, 2021 (see attached letter from MDEQ).

I reached out to you last June when we received the "Notice of Violation" from the State of Mississippi regarding the delinquent 2020 Owner's Inspection report, along with their request for an updated Emergency Action Plan.

Even though you ignored my letter/requests, I still went ahead and updated the Emergency Action Plan, along with completing the required Owner's Inspection in June 2020 to keep us all in compliance for last year as the State threatened "drawing down the lake" during a phone conversation with them if the documentation was not received.

I have now, once again, done the same for this year by completing and submitting the 8th annual Owner's Inspection Report to the state of Mississippi for 2021 (see attached letter to MDEQ).

As your corporation and its members are the principal and majority owners of the lake and levee, it is time to take responsibility.

I am open to working together to get a plan in place for lake use, maintenance and membership (and more importantly liability protection for lake owners). Without a plan to ensure that all who enjoy the lake actually contribute to future expenses and compliance, the lake is going to be drained.

Reach out when you are ready to get this done. I can be reached at 662.562.7879 or stop by anytime

Thank you.

Jill
